

Gérald Ubassy

Shape and Color

The Key to Successful Ceramic Restorations

Contents

Preface	7
Acknowledgements	11
Foreword	13
1 Basic Terms of the Phenomenon of Color	17
– Absorption and Reflection	18
– Light, Color, and Pigments in Dental Porcelain	18
– Additive and Subtractive Syntheses	20
– The Language of Colors	20
– Simple and Complex Grays	23
2 Relation of Personality, Facial Esthetics, and Dentolabial Esthetics	25
3 Colored Wax	31
– Educational Advantages	32
– Psychological Advantages for Better Communication	33
4 Color Selection	41
– Breaking Down into Coats	42
5 The Three-Dimensional Shade Guide and Changing Luminosity of Colors	49
6 Instruments	51
7 Basic (Opaque) Porcelains	57
8 The Ceramic Shoulder	61
– Prerequisites for a Ceramic Shoulder	61
– Preparing the Die	61
– First Shoulder Porcelain Bake	61
– Second Shoulder Porcelain Bake	63
9 Artificial Gingiva	67
– Fabrication of Removable Artificial Gingiva	69
10 Processing and Natural Layering of Metal Ceramic	73
– Table of Firing Temperatures	88
	5

11	Tricks to Make Porcelain Layering Easier	91
	– Fabrication of a Multi-Span Fixed Partial Denture	91
	– Fabrication of Anterior Fixed Partial Dentures	91
	– Layering and Firing of the “Dentin” Core	91
	– Density of Porcelain During Layering Procedure	94
	– Another Trick: Grinding the Incisal Guidance	94
12	Lateral Segmentation and Enamel Cracks	97
	– Restoration and Segmentation for Teeth of Older Patients	98
	– Segments of Different Opacity	98
	– Restoration and Segmentation for Teeth of Younger Patients	98
	– Segmentation of Posterior Teeth	98
	– Modeling Criteria for Porcelain of Superior Optic Quality	99
	– Enamel Cracks	99
13	Transparency and Translucency	109
14	Original Colors in Dental Ceramics	115
15	Porcelain Inlays and Onlays	119
	– General Criteria for Preparation of Ceramic Inlays and Onlays	119
	– Preparing the Working Cast	121
	– Thermal Processing of the Investment	122
	– Modeling of a Medium-Sized Inlay	123
	– Modeling of Smaller Inlays	128
	– Modeling of Large Onlays	128
	– Removal of the Investment	131
	– Natural-Appearing Fissures	135
16	Leucite-Reinforced Ceramic	141
	– IPS Empress: A New Technology in Dental Ceramics (contributed by Gerhard Beham)	141
	– The Material	143
	– Working Procedures	150
	– Pressing Technique	152
	– The IPS Die Material in Dentin Colors	153
17	Post and Core in Ceramics	179
	– Fabrication of a Porcelain Post and Core	180
18	Facial Veneers	185
	– The Empress Method for Porcelain Facial Veneers	188
19	Analysis of the Surface Structure – Polishing	197
	– Observation and Application of Information	197
	References	213
	Index	215
